

# Protecting What Matters

# Custom-designed security systems that keep families and businesses safe.

## Advanced Technology. Greater Protection. More Peace-of-Mind.

The CPI Security Real Time Response System and CPI Security inTouch® interactive services give you fast alarm response, greater protection and ultra reliable service in an incredible value-added package!

The exclusive CPI Security Real Time Response System features a wireless cellular transmitter that communicates directly with CPI's 5 Diamond Rated Alarm Monitoring Center during a break-in, fire or medical emergency. No home phone line is needed! The system also features a powerful processor that communicates vital information to CPI's Alarm Monitoring Operators in real time so they can quickly assess the situation and dispatch the proper authorities.

CPI Security inTouch allows you to remotely arm or disarm your security system, receive security-related email or text alerts, view live video from security cameras in your home and even control lights, appliances and room temperature... conveniently from your mobile phone, tablet or computer!

Now that's Powerful technology...designed to keep you safe!
